

SatBlue VOICE by X2nSat

Any healthcare facility that has experienced a loss in connectivity understands that “never again” feeling. If your hospital or medical office loses its primary connection, whether due to a fiber cut, natural disaster, or software issue, the ability to automatically and seamlessly failover to a satellite connection saves time and can help save lives.

SatBlue Voice, designed and delivered by veteran satellite network operator **X2nSat**, offers voice continuity solutions tailored specifically to the healthcare industry. These include PBX voice redundancy, satellite phones, mobile health clinics, as well as other services based on your hospital’s needs and requirements.

With network solutions focused on reliability, scalability, and responsiveness, SatBlue offers creative solutions that evolve with the needs of your organization. Because when your industry is life-impacting, nothing should interrupt your connection.

SatBlue VOICE offers a variety of robust solutions to support voice connectivity.

- PBX- Voice Redundancy
- Satellite Phones
- Mobile Health Clinics
- Hardline Phones
- Trailers
- Special Events
- Independent Phones
- Emergency Response

Cost-Effective Wireless Backup with True Path Diversity

- Seamless IP transport for compatibility with all devices and protocols
- Turnkey provider for installation and support 24/7/365

The **X2nSat** Advantage

Serving the business needs of clients since 1996, X2nSat is a full Satellite Network Operator. X2nSat owns, operates and maintains multiple satellite networks that provide service anytime, anywhere. X2nSat provides enterprise solutions with 99.9% reliability and the flexibility to meet specific customer needs.

X2nSat owns and operates a domestic 24/7/365 Network Operations and Customer Response Center, located at its primary satellite gateway in Petaluma, California. X2nSat also maintains a separate, fully redundant gateway in Norcross, Georgia, with a third being established in New Mexico.
