

X2nSat COMPANY OVERVIEW

X2nSat is a forward-thinking company leading the way into the future of satellite communications. Founded in 1996, X2nSat is helmed by a visionary executive team that is constantly pursuing excellence and innovation so that clients receive the best solutions and service.

Providing highly reliable, wireless network and communication solutions to a wide variety of industries, X2nSat owns and operates two state-of-the-art, high-capacity satellite gateways and a 24x7x365 Network Operations Center. Clients appreciate the strength of X2nSat's robust network infrastructure and its close proximity to the engineers and technicians who manage their networks.

Satellite Solutions

Our mission is to provide clients with highly reliable wireless network and communication solutions. Working “above the cloud” in a way that ensures reliability, we offer the robust services of a large telecommunications company, with the personalized customer care of a specialty organization.

Services and Solutions Include:

- Wireless Broadband
- SCADA and IoT solutions
- Business Continuity
- Point-of-Sale Connectivity
- Network/System Design
- Gateway Services (Hosting)
- 24/7/365 Technical Support
- Network management
- Installation
- Remediation

Making a Difference in the World of Telecommunications Through:

- Innovation: We are dedicated to exploring and discovering new products and services that improve the user experience
- Industry Expertise: We focus on understanding the unique needs and regulations faced by individual industries
- Superior Support: In addition to 24/7/365 technical support, all clients are assigned a dedicated project team
